

Government Grant Funding and Tax Incentive Minimisation Programs

At King & Whittle, we pride ourselves on adding value to our clients by presenting them with additional ways of growing their business and providing a cutting edge over their competitors.

One such opportunity we are thrilled to now offer our clients is how they can grow their business via Government Grant Funding and Tax Incentive Minimisation programs.

King & Whittle are available to support and educate clients on the best approach to grant funding and unearth all possible grant opportunities and programs relevant to the growth of the business.

By engaging with us, we will gain valuable insight into the future activities and plans for the business either in Australia or overseas and as a result we will produce a tailored Grant Profile and Grant Strategy to get you to your goals faster via government grant opportunities.

Two such resources all businesses should be aware of and considering for future growth are the:

- Export Marketing and Development Grant – EMDG
- Research and Development Tax Incentive- R&D

Clients of King & Whittle will now have access to assistance in lobbying government if their future projects are beyond the scope of current grant funding.

Services now include:

- Grant Profiling – understanding availability of funds
- Grant strategy – planning ahead
- Grant Writing – telling the narrative correctly
- Government Engagement – for a large capital injection to the business

Our aim at King & Whittle is to ensure our clients are at the forefront of opportunity to prosper and grow. By receiving valuable support, you are best placed for a successful outcome.

Our expert team love what they do, and we are so excited to offer this extension to our services.

We hope to provide further information to you in the next few weeks and ask that you contact your King & Whittle advisor if you would like further information or clarification at this time.
